The Ordnance Survey noted eight instances of cupmarkings, two on boulders and six on outcrops, on a spur that projects from the S side of Laggan Hill. However, the records of these sites, particularly information relating to their exact locations, are incomplete, and only four of the six examples found by RCAHMS on the date of visit could be matched with those examples noted by the OS. Visited by RCAHMS (AG, GB), 12 October 2006.

Large outcrop with over 100 cupmarks on 8 individual slabs/exposed surfaces.
